

*Your trusted one-stop
engineering solution provider*

Score EPCC Sdn. Bhd. 1187507-P
Lot 36, Block 1, Samalaju Industrial Park,
Kemena Land District,
97000 Bintulu, Sarawak, Malaysia

In the business of heavy industries manufacturing plant construction, it is crucial to establish a reliable project management and construction partner who does not just look at the scale of things but also understands the plant from the operational and maintenance perspectives.

One that exhibits an unwavering commitment to accompany you throughout the entire journey to the successful completion while looking into the sustainability of the plant.

One who will deliver on their promises to complete the project on time and within the budget. Someone with values that perfectly align with your aspirations.

Testing & Commissioning

Maintenance, Repairs & Overhaul Plant Equipment

Service Repairs on Machineries & Vehicles

Score EPCC's *360° Turnkey*

SCORE EPCC is well-positioned to provide support through integrated (360°) solutions to create a sustainable operation setup.

Civil & Structure works

Design & Build

Mechanical & Electrical installations

Project management - Single point of accountability

Building the future with Sustainable infrastructure

Score EPCC is a Bintulu-based engineering, procurement, construction, commissioning and turnkey project management company. We are a CIDB Grade 7 company with over 900 strong workforce.

Specializes in engineering and construction of industrial plants, SCORE EPCC provides comprehensive services from initial concept to final commissioning. We play a vital role in the advancement of heavy industry within the Sarawak Corridor of Renewable Energy (SCORE), contributing significantly to its growth and development.

Our Principles & Values

At Score EPCC, we envision a world where cutting-edge engineering solutions harmonize with *safety, commitment, openness, responsibility, and excellence*. Guided by our unwavering dedication based on these 5 values that are deeply ingrained in our practices, they define who we are, our mission and our vision for the future.

score

is Safety

We aim to create a secure work environment that safeguards the team while delivering uncompromising quality.

score

is Open & transparent

Transparency builds confidence and trust. Our transparent approach ensures that our clients are well informed and actively engaged in the decision making process.

score

is 100% Responsible

We believe that we are part of the larger community that we serve, their well-being is our success.

By championing certain sustainable development goals and values with those of our various stakeholders, we pledge to work together to build a better future for all.

score

is Committed to deliver

Our 360° approach to project management ensures we are committed to every step of the project.

score

is the pursuit of Excellence

Excellence is not a destination, it is a journey that requires constant improvement and learning. Over the years, we have learnt that projects are like people, we strive towards a common goal - Pursuing Excellence.

Project Management Services

Operating over ten years in Bintulu, our strength is the excellent understanding of local regulatory bodies, legislation process and most importantly, local values.

Function as a single point of accountability for the client. We integrate the activities of all contractors (often from different backgrounds and culture) for better efficiency.

Project management services cover all stages of a project from concept to completion, encompassing planning, scheduling and cost control to design, construction and commissioning.

Help clients meet sustainable investment goals while maintaining the highest safety and quality standards on all level of projects.

Value add to project by meeting clients' objectives, working with consultants for best engineering solutions and construction methods, and considering material sourcing, logistic, local culture and resources.

Civil & Structure Work

Maintaining professionalism under strict compliance in construction safety. Adapting the IBS concept by using aluminium formwork and pre-cast construction through our team of very committed, highly-trained engineers.

1

Capabilities in comprehensive construction and execution of industrial plants in challenging environments, terrains and remote places.

2

Construction management with experienced engineers, a proven track record of timely delivery, high quality output and efficient coordination of incidents.

3

Complete civil works from earthwork, infrastructure, building foundation, reinforced concrete, superstructure, steel structure, roofing and cladding.

4

Specializes in aluminium formwork installation for efficient and sustainable construction.

Mechanical and Electrical Installations

Our years in the industry provides us with rich experience in carrying out large-scale plant installation with reputable designers and equipment suppliers.

Delivery of large project construction and installation is a delicate balance between meeting industry standards and a good understanding of the client's need and requirement.

- ▶ Install high and low voltage equipment and sub-station according to manufacturer standards
- ▶ Support utilities such as water, power, data, compressor and lightings
- ▶ Ability to work in a highly controlled environment
- ▶ Install complex environmental control unit and meet the designed emission output
- ▶ Works closely with international metallurgical plant designers and suppliers:

Neuero from Germany

*Pneumatic ship
unloader for
alumina
unloading*

Demag from Germany & Metix from South Africa

*Electrode system
and furnace*

Various engineering companies & suppliers from China

*Complete plant
equipment*

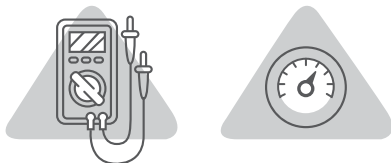

Commissioning & Maintenance

We have a comprehensive project management team in place that offers support in maintenance, technological guidance, and continuous innovation. Our goal is to maintain an excellent track record with all our clients.

What we provide:

- ▶ Highly skilled personnel with extensive knowledge and experience to carry out all stages of the pre-commissioning process, from point-to-point wiring checks, stress tests, function checks and loop checks to final handover of systems.

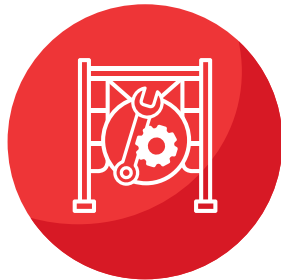

- ▶ Offer commissioning support to fulfill operational needs, delivering specialized aid in fault-finding, technical guidance and seamless handover processes
- ▶ Short and long-term contracts to ensure uninterrupted production services
- ▶ Maintenance solutions that effectively prolong the lifespan of plants and processes

Other Services

Our 360° integrated solutions from the initial design to the completion of a construction and after service does not stop there, we also provide other supporting services from raw materials supply to the procurement of tools and machineries required in the overall set-up of a factory.

Concrete Supply & Installation

Scaffolding Erection & Inspection

Machineries Rental Services

Topographical Surveys & Laser Scan Services

Drone Survey Services

Drawing Printing Services

Heavy Machineries & Assets

Equipped with a fleet of over 80 heavy machinery units including excavators, cranes, mixer trucks, and tipper trucks, we offer comprehensive support to ensure exceptional performance and meet production timelines.

Machinery	Quantity
Excavator	31
25t Mobile Crane	36
Lorry Mixer	16
Tipper Truck	8
Lorry Crane	8
Wheel Loader	6
Compactor	2
Trailer	3
Concrete Pump	1
60t Crawler Crane	1
90t Crawler Crane	1
100t Crawler Crane	1

Past & present - Key projects

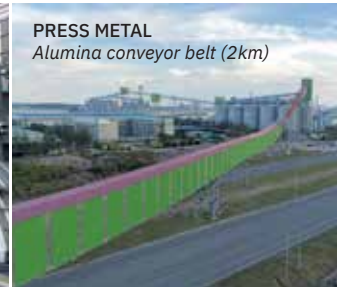

PRESS METAL
Aluminium production plant

PRESS METAL
Power grids

PRESS METAL
Aluminium smelting potlines

PRESS METAL
Alumina conveyor belt (2km)

PMB Silicon
Silicon production plant

PMB Silicon
Submerge arc furnace

Based on our proven track records and vast experience, we are capable of delivering integrated solutions for diverse international industries, taking into account local regulatory bodies and legal frameworks.

PROJECTS	YEAR
1 130 acres Earthwork for Press Metal Bintulu phase 3	2019
2 160 acres Earthwork for PMB Silicon	2017
3 34 acres Earthwork & infrastructure for LCM Logistic yard in Samalaju	2020
4 2x 1.1KM length Potline building for Press Metal Bintulu phase 3	2020
5 60m height Multi sotrey Arc furnace steel structure building 1a & 1b	2018, 2019
6 70m concrete Chimney	2020-2021
7 16 Alumina storage silo	2020-2021

PROJECTS	YEAR
8 Casting house for 10 casting lines	2017-2018
9 220000 Nm3/hr Deduster machines installation and commisioning	2018
10 37.5 MVA Electrical arc furnace installation and commisioning	2017-2018
11 275KV AIS Substation and transformers	2020
12 Pot Tuning manchines installation and commisioning	2021
13 Water cooling system	2020
14 Air compressor system 2020 15 Turnkey for KYH recycle plant	2019-2020
